

WebX Global Chain Commerce Wealth Code

Bridging Digital Economy, Empowering Real - World Industries

A Historic Opportunity: Global Trade Is Being Redefined

**Traditional trade is
reaching its endpoint**

**Digital trade is becoming
mainstream**

**Cross-border e-commerce
is maturing**

**The chain commerce
ecosystem is rising**

With finite carriers, we connect infinite possibilities. Through chain-based commerce and digital empowerment, we are reshaping the new global commercial order. Rooted in the global industrial ecosystem, we connect cross-border value pathways, build a next-generation global chain commerce digital trade system, and lead the new era of chain commerce.

Five Major Challenges of Traditional Cross-Border E-Commerce

Fragmented Channels, Highly Acquisition Costs

High Platform Commissions
That Eat Away at Your Profits

Unstable Supply Chains

Inconsistent Quality Control & Delivery Standards

Slow Cash Flow & Capital Turnover

Complicated Cross-Border Payments & High Financial Risks

Struggling to Build a Global Brand

No Systematic Operations or Global Strategy

Going It Alone

No Ecosystem Support — Weak Risk Resilience

Our Digital Era —

- With supply-chain integration as the core,
- global channels as the network,
- and digital technology as the foundation,
- WebX builds a global innovative ecosystem where merchants pay no commission and users receive rewards.
- It connects products, merchants, users, services, digital assets, and capital, forming a closed-loop, replicable, and sustainable global chain commerce ecosystem.

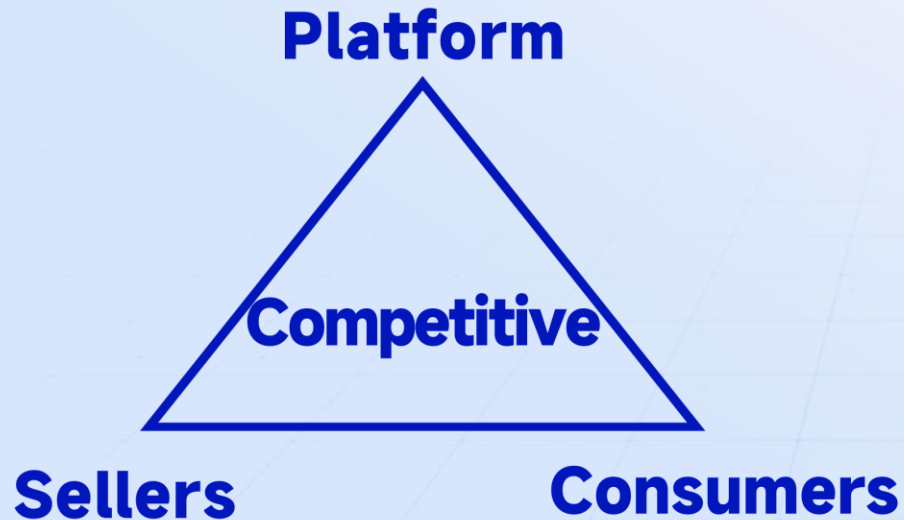

Completely Reshaping the Zero-Sum Game Between Platforms, Merchants, and Consumers

WebX captures the historic opportunity of global financial openness and creates a digital-economy participation channel for global users with lower entry barriers, stronger asset liquidity, and fairer dividend distribution.

Guided by the core concept of "co-building, co-creation, and shared success," WebX builds a globally coordinated and sustainably scalable ecosystem loop, becoming a core vehicle for industrial capitalization and capital digitization in the Web3 era.

Web2.0

Web  全球链商
Global Chain Commerce

A Global Innovative Chain Commerce Ecosystem Platform for the Web3 Era

The WebX global chain commerce platform takes "industry-finance linkage" as its development core. It deeply binds digital assets with real-industry rights and interests, successfully opening the full value pathway of "traffic, industry, and capital." Consumer data is converted into personal assets, while real-world merchants connect with global capital.

OPEN A NEW ERA OF CHAIN COMMERCE

WebX Core Vision and Mission

Vision

Connect the world and create a shared future. Enable global commerce to break through the limits of geography, national borders, and business models, achieving full-scenario service coverage across "buying and selling globally, serving globally, everyday life needs, food and entertainment."

Mission

Open the complete value pathway from consumption to assets. Build a new chain commerce relationship based on "co-building, co-creation, and shared success," and provide a replicable and scalable practice model for commercial transformation in the digital economy era.

Buy and sell globally | Serve globally | Everyday life | Food and entertainment | Global linkage | Co-create and win together

MALL

Global Treasures, One-Stop Shopping

From beauty brands and trendy fashion to smart home essentials and mother & baby products — everything you want is right here.

LOCAL STORES

Connect with Premium Local Merchants

Whether it's express supermarket delivery, restaurant dining, or entertainment — your local life is just as vibrant and convenient.

GLOBAL SELECTS

Expertly Curated by Professional Buyers

Overseas bestsellers and exclusive niche finds — no proxy purchasing required. Shop the world in an easy way.

TRAVEL & TICKETS

Flights • Hotels • Local Transportation

Every business trip and vacation earns you rewards toward your next adventure.

Consumers

Web3 investors

Merchants

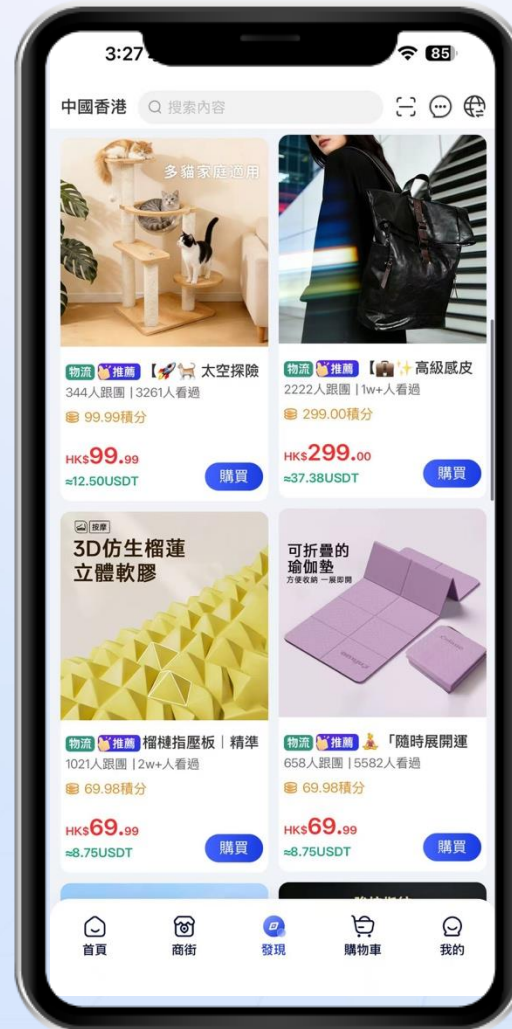

Entrepreneurs and KOLs

WebX Global Distributed O2O E-commerce

WebX Bingo

WebX Chain Commerce

WebX——A Globally Innovative Chain Commerce platform

Merchants

Zero commission. A growth partner for opening new profit channels and building real user asset accumulation.

Consumers

A lifestyle partner that delivers exceptional experiences and ensures continuous returns for consumer contributions.

Partners

An open platform offering expansive entrepreneurial space and shared ecosystem development dividends.

Global Nodes • Infinite Connections

Node/North America

Node/Europe

**Node/Middle
East & Africa**

Node/East Asia

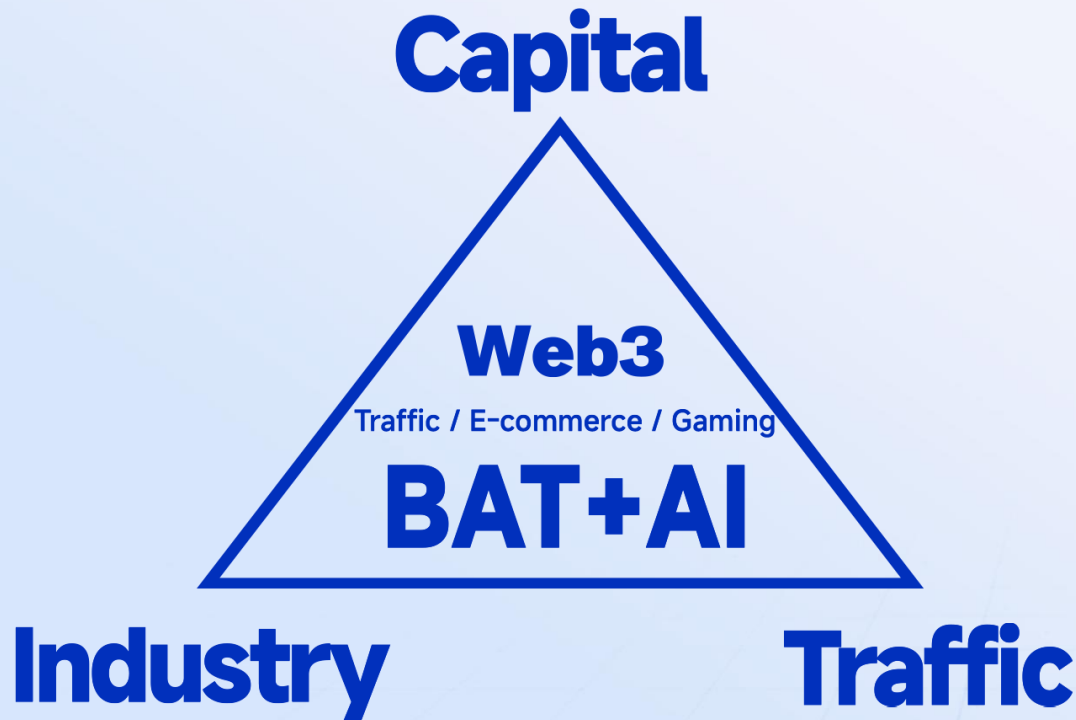

Node/South America

**Node/Southeast

WebX Global Chain Commerce Industry-Capital Integration Map

BRIDGING DIGITAL ECONOMY, EMPOWERING REAL - WORLD INDUSTRIES

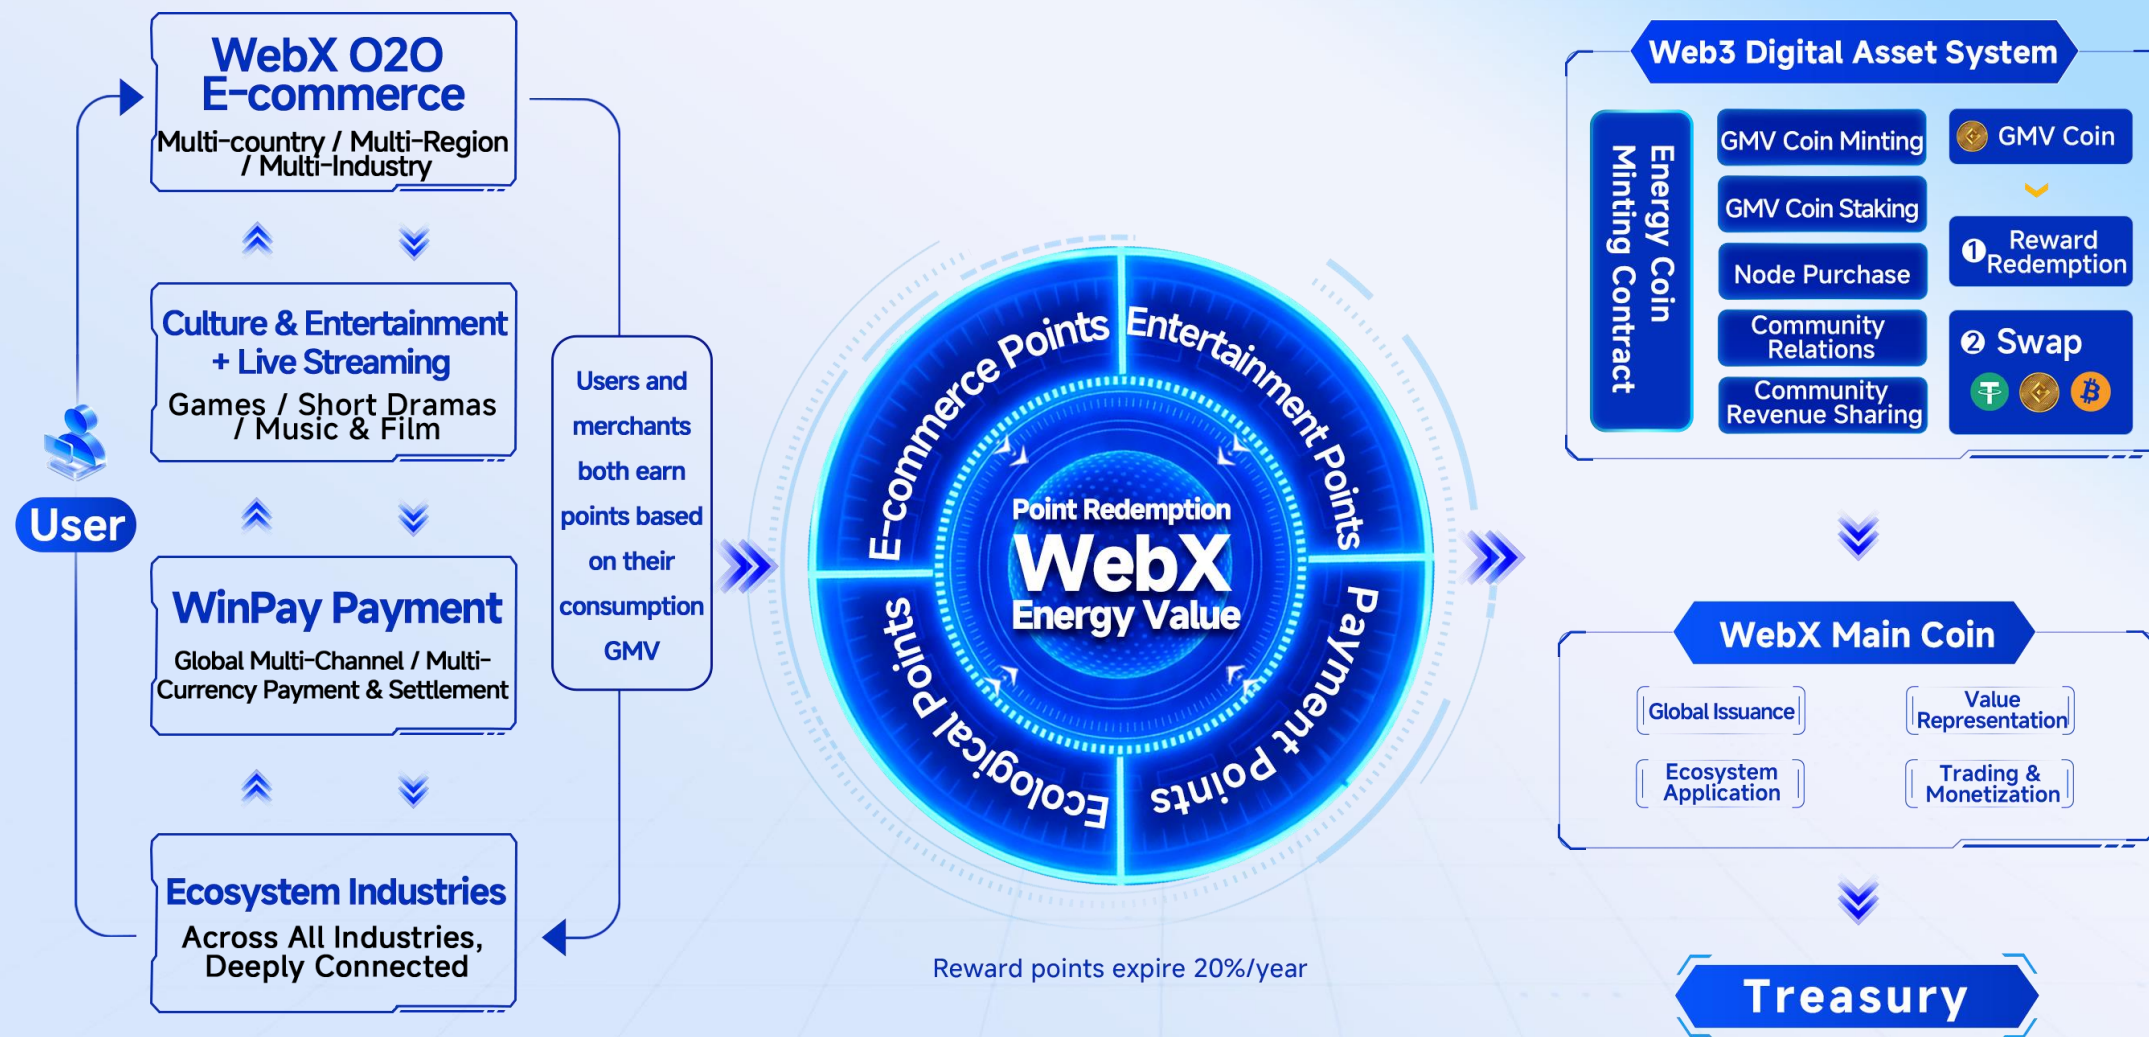

Overall Logic of the WebX Economic Model

Consumer points, GMV Coin, and WebX Platform Token

Consumption Points + Energy Coins + Industry-Finance Synergy + Web3 Digital Capital

WebX System Logic Overview

Economic Model: GMV Coin

1、 Issuance Mechanism

- » Token issued:GMV (Gross Merchandise Volume)
- » Issuance volume: issued on demand in line with the GMV of real-world industries.

2、 Circulation Mechanism

- » No private placement.
- » Users obtain energy through consumption in the real-industry ecosystem, submit it to the Web3 capital side, and mint GMV Coins.
- » Users may obtain GMV Coins publicly through exchanges.
- » Users may obtain GMV Coins through global nodes.

Economic Model: GMV Coin

3、Trading

Core feature: open and transparent.

Trading platform: public BSC DEX.

Transaction taxes: 5% buy tax and 5% sell tax.

4、Issuer

Issuer: Dubai BingoX Capital.

Economic Model: GMV Coin

5、Energy Minting

The baseline daily GMV energy minting release rate is 0.04%. It will be adjusted within a range of +/- 0.01% based on the platform-wide monthly consumption and incentive ratio.

No threshold, no handling fee, no lock-up, and flexible entry and exit.

Minting Acceleration Mechanism (Calculated based on the actual USDT value of staked GMV Coins)

Staked Value in USDT	Acceleration Multiplier
0-999	-
1000-4999	1.3
5000-9999	1.5
10000-49999	1.7
50000 and above	2

Minting Formula Personal daily minting amount = (personal energy held x network-wide minting release rate x personal staking acceleration multiplier) / GMV Coin price at the time of minting.

Minting Time Point One new epoch, approximately 115,187 BSC blocks, at an interval of roughly 24 hours.

Economic Model: GMV Coin

6、 Staking Yield, Simple Interest

Core Rule

The staked GMV Coin principal can enter and exit flexibly, with no handling fee and no lock-up.

Yield Calculation

For each on-chain Rebase cycle, approximately 24 hours, staking yield is automatically calculated.

Yield Withdrawal Acceleration Rules

Linear release according to increases in on-chain block height.

Liquidity Rule for Yield Withdrawal

Coins obtained through linear release may independently enter Swap trading or be staked again.

Linear Acceleration Period	Acceleration Fee (Current Equivalent in WebX Platform Token)
Approximately 180 days	0%
Approximately 90 days	10%
Approximately 30 days	20%
Approximately 10 days	25%

7、 Global Nodes

Purchasing a global node can generate community promotion rewards and GMV Coins, with no lock-up.

Economic Model: GMV Coin

8、Community Dynamic Reward Mechanism

Reward Formula: Direct referral ratio = revenue-sharing base

Indirect referral ratio = revenue-sharing base x 50%

Community reward cap: cumulative community rewards must be less than or equal to 5x the participant's current staked principal

Community Revenue-Sharing Source Table

Item	Description	Revenue-Sharing Base
Minting	Minting revenue share from referred participant	12%
Staking Yield	Staking revenue share from referred participant	12%
Global Node	Node-purchase token revenue share from referred participant	3%

Yield Withdrawal Acceleration Rules:

Linear release according to increases in on-chain block height

Linear Acceleration Period	Acceleration Fee, (Current Equivalent in WebX Platform Token)
Approximately 180 days	0%
Approximately 90 days	10%
Approximately 30 days	20%
Approximately 10 days	25%

Community Revenue-Sharing Example

Promotion relationship: A referred B, and B referred C

Minting revenue share

if C receives 10 tokens from one minting event, B receives 12% x 10 tokens, and A receives 50% x 12% x 10 tokens

Staking revenue share

if C receives 10 tokens from one staking event, B receives 12% x 10 tokens, and A receives 50% x 12% x 10 tokens

Node revenue share

if C receives 10 tokens from one node purchase, B receives 3% x 10 tokens, and A receives 50% x 3% x 10 tokens.

Economic Model: WebX Platform Token

1、 Issuance Mechanism

Token issued: WebX. Total issuance:
1.2 billion tokens

2、 Circulation Mechanism

WebX Platform Tokens may be
obtained publicly through exchanges

3、 Trading Rules

Open and transparent, fixed issuance, no transaction tax,
ecosystem consumption, liquidity support, burn
mechanism, cross-chain interoperability, and
trading/liquidation.

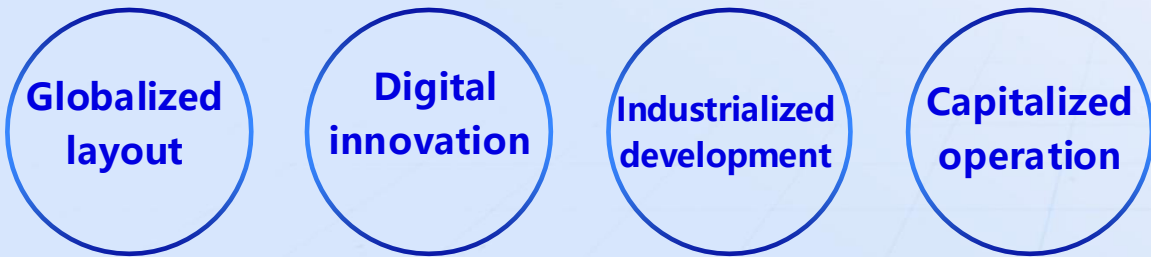

Global Development Plan and Implementation Path

With globally distributed sites and core strategic anchors in international financial centers and compliant digital-asset hubs such as Dubai, Hong Kong, and Singapore, WebX builds a global development pattern of "regional linkage + global expansion."

Five-Year Phased Implementation

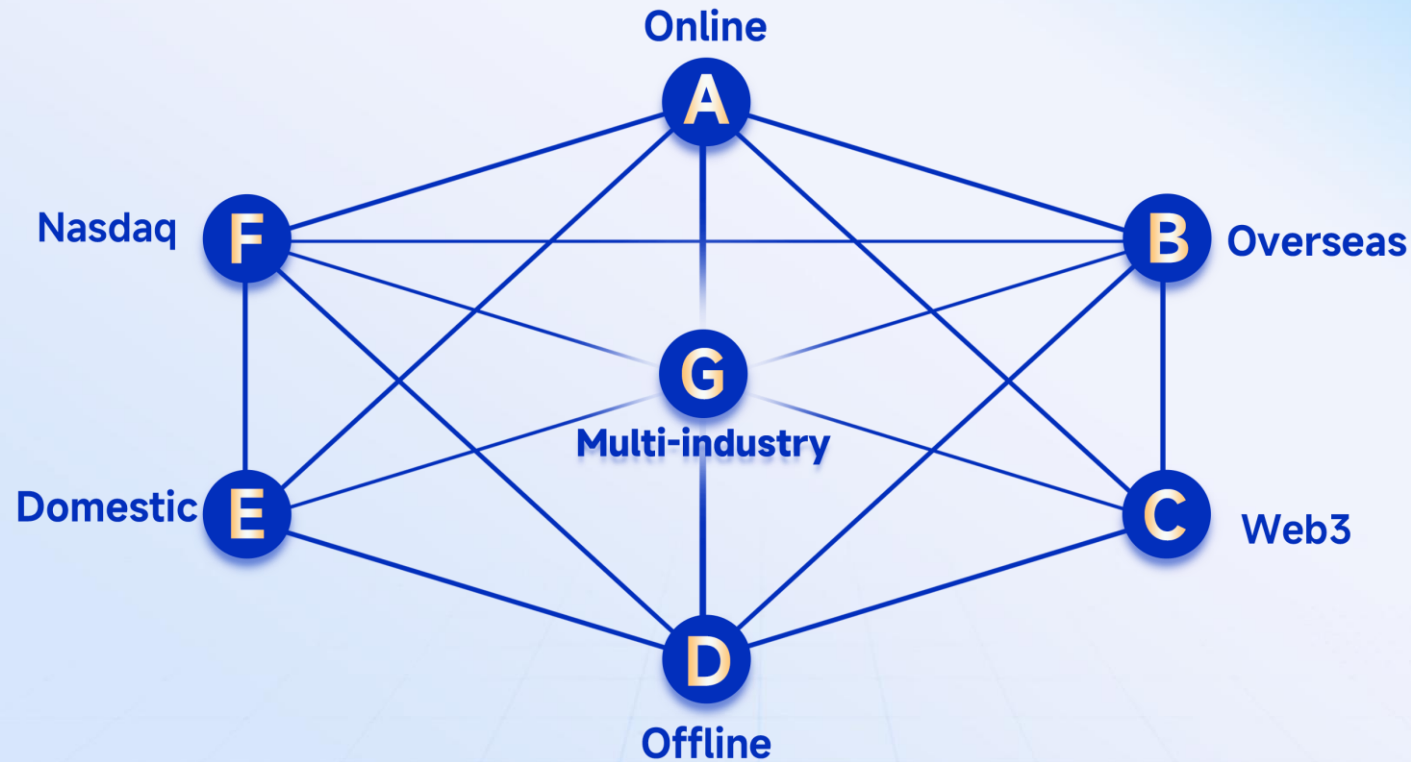

Traditional foundation-building period, 1-2 years

Asia-Pacific expansion period, 2-3 years

Global ecosystem period, 3-5 years

Multidimensional matrix

**Operations across all industries, 24 hours a day,
worldwide Traditional capital + Web3 digital capital**
